

Mobius®

The entire chair serves as a control system. Referred to as a patented design concept of “body-regulated ergonomics,” Mobius represents a major breakthrough in seating design. Stunning, passive ergonomic seating is exceptionally simple to work with. Complex curved back provides dynamic lumbar support and gently “hugs” the torso. Super strong polymer shell flexes in response to your movement. Pneumatic seat height adjustment; “inverse synchro-tilt” opens torso for better circulation. Tilt limiter features infinite locking to control range of motion. “Zero lift” seat front helps keep feet on the floor when reclining. Meets or exceeds ANSI/BIFMA and ISTA performance standards. Covered by The HON® Limited Lifetime Warranty.
